

Innovative. Comprehensive. Trusted.

Solas Energy® is a leader in strategy, development, and consulting services for renewable energy, energy storage, and sustainability solutions throughout North America.

Established in 2009
Women-Owned
Enterprise

115 GW+

Renewable Energy
Project Experience

1000+ 

Projects
Consulted

Our expertise spans strategy, development, and management of utility and commercial projects involving wind, solar, biomass, hydropower, geothermal, hydrogen, energy storage, grid modernization, and electric vehicles (EV).

Solas Energy has over 20 years of experience in new market entry strategy, project development, project and construction management, commercial structuring, and sustainability advisory. We provide our clients with the depth and perspective required to navigate the complex issues associated with energy decarbonization, emerging technology assessment, and climate change policy. As an independent, women-owned enterprise, Solas Energy helps companies and organizations achieve a sustainable, low-carbon future.

"Solas Energy provided us with a succinct, yet very comprehensive report setting out the structure of the likely future of carbon in Alberta... The quality of work was excellent and delivered exactly what we were looking for within a very tight timeframe over a challenging period. This supported us in making valuable and informed decisions about future capital investments."

- Corporate Development Manager, ATCO

Innovative. Comprehensive. Trusted.

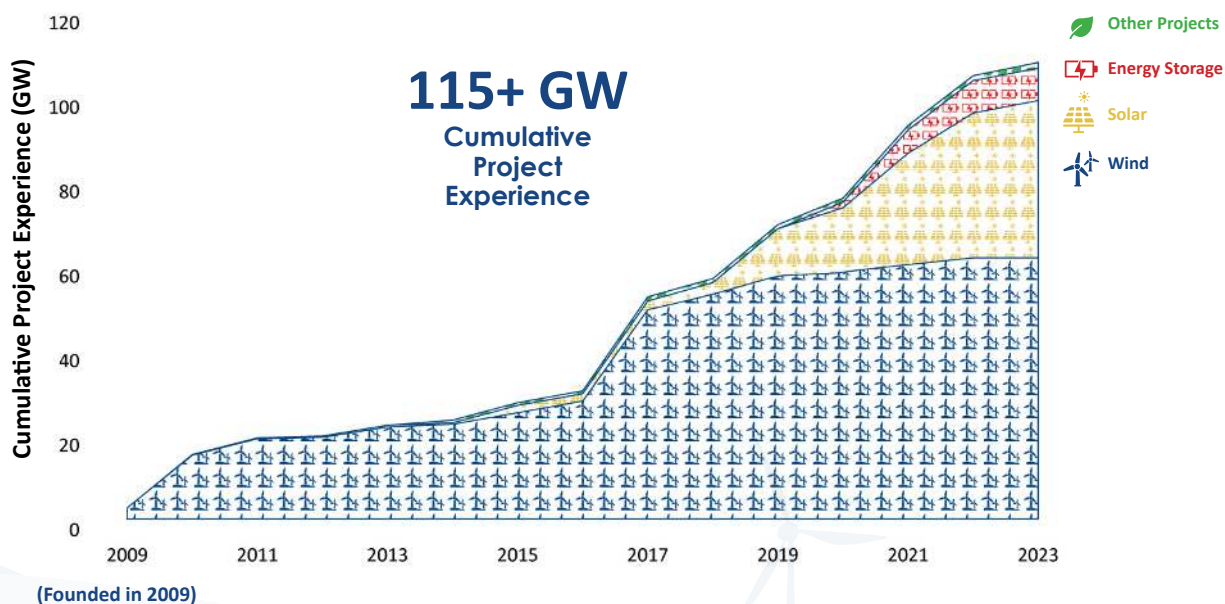

Sustainability is at the heart of everything we do. Our foundation is based on being an Innovative, Comprehensive, and Trusted partner for our clients.

We take an innovative approach to our work, by efficiently and accurately identifying and solving our clients' unique challenges and uncovering opportunities for strategic growth. Our comprehensive services model pulls from over 20 years of experience in developing sustainability solutions. Solas Energy's team of experts supports our position as leaders in emerging technologies and trends.

"Solas Energy's experience in project and construction management for utility-scale solar energy and battery energy storage systems has been critical to the success of (our) large-scale project."

- Chief Executive Officer, Terra-Gen, LLC

Solas Energy's Environmental, Social and Governance (ESG) plan focuses on reducing our carbon footprint, educating our employees, customers, and the communities where we work. We promote diversity and inclusion in our workforce, maintain health and safety best practices, and guide our actions with the highest ethical standards. We believe ESG is the framework for future growth within the renewable energy, energy storage, and sustainability industries.
