

From feasibility to storage integration, we simplify complexity and unlock project value.

Solas Energy® provides comprehensive strategy and consulting services for solar photovoltaic (PV) projects.

Our experience spans the full life cycle of a solar project — from feasibility and early planning through permitting, development, and operations support. Solas Energy helps project owners, developers, and investors make informed decisions and reduce risk.

Commercial and
Utility-Scale Projects

Return on Investment Analysis
for Large Corporations

2.1 GW Solar Glare
Assessments

Large-scale Integrated
Solar and BESS Project and
Construction Management

Feasibility Assessments

- Detailed environmental and jurisdictional constraint analyses on brownfield and greenfield sites.
- Energy output assessments using **PVsyst**.
- Due diligence reviews to determine project risk and investment potential.

Development

- Comprehensive permitting and regulatory services.
- Building effective stakeholder relationships through knowledgeable engagement.

Solar Glare Assessments

- Glare impact assessments using **GlareGauge**.
- Regional and international airport risk assessments during takeoff, landing, and circling.
- Alignment with jurisdictional requirements.
- Catalogued glare rankings of hazard risk.

Solar and Battery Energy Storage

- Energy storage modelling using **HOMER** and **Fractal**.
- Feasibility studies to determine optimal sizing and integration for on-grid and off-grid applications.

"Solas Energy's experience in project and construction management for utility-scale solar energy and battery energy storage systems has been critical to the success of our large-scale project."
