

Solas Energy® provides comprehensive strategy and consulting services for renewable energy solutions. With over 20 years of experience in project development and construction management, Solas Energy also advises clients in related process and technologies, including Spill Prevention, Control and Countermeasure (SPCC) Plans to ensure that customers have a plan to effectively prevent, contain, and respond to spills.

Time Management

Easy turnover from EPC to Owner

20+ years SPCC Plan experience

Steel Tank Institute SP001

Solas Energy Consulting provides comprehensive SPCC Plan services, including:

- Preparation of site plan maps based on customer field surveys
 - Site photographs
 - Identification of site drainage and spill receptors
 - Documentation of capacity and condition of existing tanks and containment
- Site visits for gathering SPCC Plan data
- Draft construction and operational SPCC Plans
 - Meets 40 CFR, Part 112 requirements
 - Recommended site modifications to address structural deficiencies
- Documentation of operating procedures to prevent spills
 - Facility protocols during transfer and storage of petroleum products
 - Maintenance and inspection schedules
- Control measures to prevent spills from entering the environment
- Spill response protocols to contain and respond to spills
- Construction and Operations plans for quick conversions from Engineering, Procurement, and Construction (EPC) Plan to Project Owner's Plan
- One lump sum to eliminate change orders
- Full review to promote compliance with federal and state regulations
- Expertise specific to utility-scale solar, storage and wind for oil-filled operational equipment, secondary containment considerations, and Oil Contingency Plan preparation
- Integrity testing applicability analysis
- Professional engineer (PE) certification

"Solas Energy's team of environmental and professional engineers provided a streamlined and cost-effective solution for creating a comprehensive SPCC plan for our site. Their unique expertise in operational equipment for utility-scale renewable energy projects added to the efficiency of documenting our SPCC Plan, eliminating the need for costly engineering change orders. Our SPCC Plan was delivered on time and within budget."
