Permitting &
Operational Compliance

Solas Energy offers a comprehensive range of consulting services to support compliance, permitting, and training for solar (PV), wind, and energy storage projects, including:

Project due diligence services:

- Rapid turnaround of high-level Critical Issues Analysis (CIA)
- Detailed environmental and permitting due diligence for project acquisitions
- Comprehensive environmental reports for project sites
- Identification of site-specific permitting and agency approval requirements

Project siting services:

- Identification of land best suited for solar (PV), wind, and energy storage projects
- Assistance with landowner lease and/or purchase negotiations
- Review of title compliance and lease and/or purchase agreements
- Detailed assessment of risks associated with land options

Compliance and permitting services include:

- Preparation and submission of local, state or provincial, and federal permits
- Project management of permitting and agency approval requirement activities
- Development of environmental compliance plans, including:
 - » Spill Prevention, Control and Countermeasures (SPCC) Plans
 - » Stormwater Management Plans
- Project management for pre- and post-construction environmental monitoring
- Project management for operational environmental compliance

Environmental studies and training services include:

- In-depth Critical Issues Analysis (CIA)
- Phase 1 Environmental Site Assessment (ESA)
- Project management of environmental studies, including:
 - Habitat assessments
 - Cultural resource surveys
 - » Wetland delineations
 - » Noise impact and shadow flicker studies
- Environmental constraints mapping
- ArcGIS-based environmental evaluations
- Operational environmental compliance training

“Through our ongoing, trusted relationship with Solas Energy, we know they will design and implement operational compliance procedures using an innovative approach, with an experienced eye to cost-effectively manage the details.”
