Project Experience

1,000+ 

Projects
Consulted

Solas Energy’s expertise spans strategy, development, and management of utility and commercial projects involving wind, solar, hydrogen, energy storage, grid modernization, biomass, and ZEV mobility.

Since 2009, we have served as a trusted partner for project development, construction management, and climate change advisory services, supporting renewable energy projects, including gigawatt-plus installations. We provide our clients with the technical expertise needed to effectively mitigate the risks associated with complex engineering, financing, contracting, and other operational challenges of large-scale renewable energy and navigating the intricacies of climate change policy.

“Solas Energy provided us with a succinct, yet very comprehensive report setting out the structure of the likely future of carbon in Alberta... The quality of work was excellent and delivered exactly what we were looking for within a very tight timeframe over a challenging period. This supported us in making valuable and informed decisions about future capital investments.”

- Corporate Development Manager

Our Consulting Services

Business Lifecycle:

- Strategy
- Feasibility
- Development
- Commercial Structuring
- Project and Construction Management
- Operations
- Repowering

Regulatory:

- Permitting
- Expert Witness

Advisory:

- Due Diligence
- Sustainability / ESG
- Life Cycle Analysis

Our Technical Expertise

Industry Studies:

- Policy & Markets
- Emerging Technologies

Technologies:

- Wind
- Solar
- Energy Storage
- Grid Modernization
- ZEV Mobility
- Hydrogen
- Biomass

Climate Change:

- GHG Quantification
- Policy & Regulations

Innovative. Comprehensive. Trusted.

Sustainability is at the heart of everything we do. Our foundation is based on being an Innovative, Comprehensive, and Trusted partner for our clients.

We take an innovative approach to our work, by efficiently and accurately identifying and solving our clients' unique challenges and uncovering opportunities for strategic growth. Solas Energy's comprehensive services model pulls from multiple decades of experience in developing sustainability solutions. Our team of experts supports our position as leaders in emerging technologies and trends.

"Solas Energy's experience in project and construction management for utility-scale solar energy and battery energy storage systems has been critical to the success of (our) large-scale project."

- Chief Executive Officer

Our Sustainability and Environmental, Social and Governance (ESG) objectives focus on reducing our carbon footprint, educating our employees, customers, and the communities where we work. We promote diversity and inclusion in our workforce, maintain health and safety best practices, and guide our actions with the highest ethical standards. We believe ESG is the framework for future growth within the renewable energy, energy storage, and sustainability industries.
